

Sprint 2 Report
Easy Commerce
01/03/2017

Actions to stop doing:

1. One thing our team should stop doing is being late to the scrum meetings. Being on time to the meetings will allow for more time to do code walkthroughs and debugging as a group.

Actions to start doing:

1. One thing we should start doing is continuous integration .We should begin demoing our work to each other at regular intervals to ensure that progress is being made and we are not veering off course.
2. Another thing we should start doing is asking for help when needed. If we are having trouble completing our task or making progress we should ask other team members for help. This can help with task that we fail to estimate the correct user story points.
3. Another thing we should start doing is looking into other databases. We have encounter some problems when making some editions with Sqlite, we are trying to migrate to another database platform, maybe Mysql.

Actions to keep doing:

1. One thing we should keep doing is maintaining close to daily communication between team members so we know their status on the project and know how our team is doing as a whole.
2. Another thing our team should keep doing is having weekly meetings so we can collaborate, discuss, and work on the project together.

Work completed/not completed:

Completed:

- Setting up credit card purchasing format

- As a buyer/vendor, I want a detailed welcome page so that it can redirect me to the right place.(15pts)
 - Create a welcome page that has redirection for buyers/vendors.
