

Sprint 1 Report

Easy Commerce

2/13/17

Team Members:

Gerardo Espinoza (gespino7)

Paula Espiritu (mespirit)

Ali Alkaheli (aalkahel)

Michaela Molina (mjmolin)

Daniel Hu(jhu125)

- **Actions to stop doing:**

1. One thing our team should stop doing is the way we keep track on our updates, instead of keeping track of points we will keep track by hours.

- **Actions to start doing:**

- One thing our team should start doing is committing to the public repository more often so we can track each other's progress.
- Another thing we should start doing is asking team members for help when encounter problems.
- Another thing we should start doing is discussing our fields of experience (ex: HTML/CSS, databases, Python, etc.) so team members know who to go to for help.
- Another thing we should start doing is listing user story tasks more efficiently, where tasks are independent of each other.

- **Actions to keep doing:**

- One thing we should keep doing is having meetings 3 times a week. This allows to cover details and problems that we cannot go over during scrum meetings.
- Another thing we should keep doing is refactoring the databases as a group so that we can cover the details of the table definitions.
- Another thing we should keep doing is having our cooperative atmosphere.
- Notifying team members if you cannot make a meeting or will be late.

- **Work completed**

- Familiarized with web2py
- PyCharm environment got set up for everyone
- Contributed to the github repository together

- Finished setting up data tables structure including vendor table, user table, and invoice table
- As a vendor, I want to track my store progress so that I can have better insight on how my store is doing.
 - All tasks complete
- **Work not completed:**
 - Stories Completed:
 - As a vendor, I want to display my online shop so that I can sell items to customers (4/13 pts complete)
 - Create a page layout for selling items
 - Current Progress: Working on dynamically creating page based on database
 - Stories Not Completed:
 - As a vendor, I want to create an online shop so that I can sell items (4/21 pts complete)
 - Create a login system so vendor can go to vendor only landing page
 - Upload pictures and item information
 - Make a vendor only sales dashboard
 - Create option to update order status and tracking
- **Work completion rate:**
 - Total Work Hours estimated: 72 hours
 - Completed Story Points: 31/55
 - Email final burnup chart to TA
