**Sprint 3 Report**
**Easy Commerce**
**3/17/17**

If we had another sprint, these are some things we would consider:

**Actions to stop doing:**
1. We would want to stop being late to scrum meetings, because this interferes with the flow of the meetings and is a detriment to group efficiency.
2. We would want to stop assigning tasks that fail to align appropriately with the current direction of the project.
3. We would want to stop or decrease cell phone and laptop usage during class, in an effort to increase our information intake, thus acquiring a greater toolset for use during project work.

**Actions to start doing:**
1. We would want to start sharing more of our problems with the group at a regular interval, to increase the chances of finding a solution quickly or at all.
2. We would want to start being more attentive to our group members' requests for help over our communication network, Slack, instead of waiting for others to answer.
3. We would want to start attending class at a more regular interval, in the hopes that we could gather knowledge that would be applicable to our project.

**Actions to keep doing:**
1. We would want to keep meeting many times a week, because this helps us keep track of our progress as a group.
2. We would want to keep following the Scrum process by utilizing such methods as User Stories, Scrum Boards, Story Points, and the prioritization of the Product Backlog.
3. We would want to keep maintaining a friendly and cooperative atmosphere during our Scrum Meetings and coding sessions, in the interest of maximizing the use of our collective potential.

**Work completed/not completed**:

**Completed:**
- As a buyer, I want to be able to select from a list of existing vendor so that I can purchase items from a particular shop.(total = 8pts)
    - Create a page for display existing vendor.(5pts)
